

VITAMIN

Product Specification Sheet

Product Description

The K Lamp consists of two parts – a shade that acts as a diffuser and a base that houses the lamp. Two solid ceramic forms interact to create a single, striking silhouette. The base form houses the lamp and the shade gently reflects the light into the room. This dispersed glow is achieved by an LED bulb allowing the lamp to be used in both ambient and working situations.

Product Type: Table Light

Materials: Ceramic

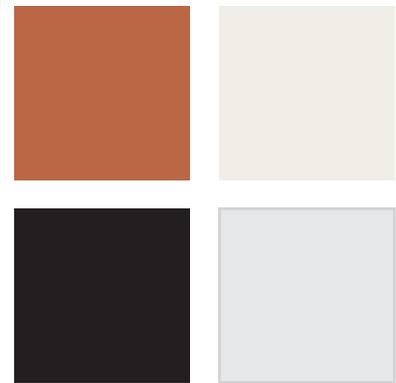

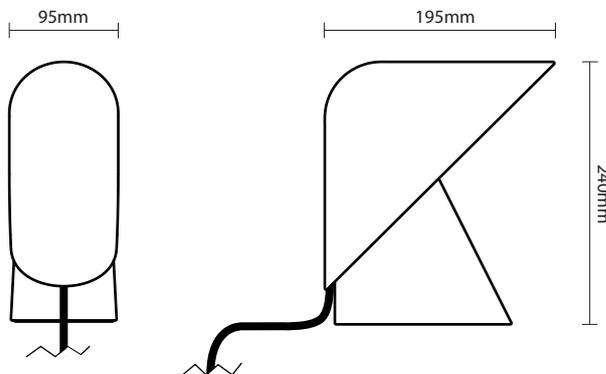

Fittings: EU/UK Plug
